Profile

AI and full-stack developer building applied AI products end to end, from self-hosted LLM pipelines to production web platforms. Currently developing Feyaklink, an AI-powered URL safety, scam detection, and responsible-consumption platform, selected for Esprit's 13th Bal des Projets. Track record across five hackathons and innovation programs, including three podium/top-10 placements. Also works as a Game Development Instructor at GOMYCODE, teaching Unity and C# to new developers.

Languages

Arabic — Native, French — Fluent, English — Fluent

Education

License, Business Computing
Esprit School of Business
2024 – Present

Technical Skills

- **Languages** — Python, Java, JavaScript, R, C#
- **Web & Mobile** — Laravel, React.js, Vite, Flutter, XAMPP
- **AI & Data** — Machine Learning, RNNs, LLM integration (Ollama, Groq), Pandas, Matplotlib, Seaborn, Power BI
- **Databases & Tools** — SQL, MySQL, Git, UML, FastAPI
- **Automation & Scraping** — Selenium, BeautifulSoup, n8n
- **Soft Skills** — Teaching & mentoring, public pitching, entrepreneurship, project management, intercultural communication (Arabic, French, English)

Experience

Founder & Manager

Banzai Shop
10/2022 – Present

- Founded and run an online sustainable fashion marketplace, managing sourcing, digital marketing, and sales end to end.
- Built a garment upcycling process that converts textile leftovers into new sellable products, reducing waste while generating profit.

Game Development Instructor

GOMYCODE
07/2026 – 08/2026

- Teach Unity, C#, and game engine fundamentals to beginner cohorts, structuring a 3-week for 2 months curriculum that takes students from core concepts to building a playable game from scratch.
- Design hands-on lesson plans covering the Unity Editor workflow, game mechanics, and iterative project-based learning.

Certifications

- Rapid Application Development with LLMs
- Building Transformer-Based NLP Applications
- AI for Predictive Maintenance
- Hedera Hashgraph Developer
- NVIDIA AI certification Applications of AI for Predictive Maintenance

Key Projects

Feyaklink

AI Scam Detection & Responsible-Consumption Platform | Selected, 13th Bal des Projets, Esprit
2026 – Present

- Dual-purpose platform pairing URL/social-media scam detection with an SDG 12 responsible-consumption scoring module for Tunisian consumers: image authenticity checks, seller certification, community reporting, and a multilingual assistant (EN/FR/AR/Derja). Laravel 11, React 18 + Vite, Python FastAPI microservices, self-hosted Ollama with Groq cloud fallback. Deployed free-tier across Vercel, Render, and Supabase; authored the SDG-first grant application and business case.

AI-Verified Escrow Platform

first place , the build room hackathon
2026

- Built the AI core of an escrow app where funds release only after autonomous agents verify the work: an LLM planner converting prose requirements into a locked acceptance checklist, and three sandboxed verifier agents (HTTP, browser, vision) that test deliverables and attach evidence to each verdict. Owned the escrow state machine and async callback pipeline end to end.

BatchTwin

Top 6 of 40+ teams, "Automate or Die" Hackathon (IEEE Tunisia Section)
2026

Placed among the top 6 of over 40 competing teams at a national automation-focused hackathon organized with IEEE Tunisia Section, Enactus, CJD, ATUGE, and ATIA.

Oxygena

IoT/AI Wildfire Early-Warning System | Innovation / Climate Challenge Project
2026

- National automation hackathon organized with IEEE Tunisia, Enactus, CJD, ATUGE, and ATIA.

Sabbër

Tunisian-Dialect Voice Agricultural Advisory (IVR)
2026

- Voice-based IVR tool giving smallholder farmers agricultural guidance without literacy or a smartphone; prioritized deployment regions via governorate-level market gap analysis of rural vulnerability data.

Aurora

Smart Floating Solar Platform | Innovation Project
2025 – Present

- Co-developed an AI/IoT platform for the Clean Water and Clean Energy SDGs, with pollution-detection models and Power BI dashboards over live environmental sensor data.

ACHIEVEMENTS & RECOGNITION

1st place — the build room hackhathon
09/08/2026

3rd Place — AI Robotics Bootcamp, Esprit
18/12/2025

3rd Place — WAICA Re GreenPrint Hackathon, WAICA RE
02/05/2026

Top 6 of 40+ teams — "Automate or Die" Hackathon, IEEE Tunisia Section
29/07/2026

Selected participant — 13th Bal des Projets, Esprit
10/07/2026

Virtual Delegate — World Bank Youth Summit
18/08/2026

Top 10 — AixCyber Hackathon, AI & Cybersecurity, Esprit
10/12/2025

Participant — MASSAI 2025, Mediterranean & African Summer School on AI
05/07/2025

Active Member — DeepFlow AI Club, Esprit
11/10/2025
Data Science & visualization workshops
